happy hours, and our infamous annual Christmas party (planning to have it in Caribbean this year!).

Flexibility:

Sometimes life gets in the way; at Advoco we accommodate for life's unexpected challenges.

Family: At Advoco, we consider each other family. We support one another in and out of the work place. Whether you have a question or need some advice, you will always have a friend to lean on here.

THE WORK

Your main focus will be contributing to the technical implementation of the Infor EAM system. This job requires passionate and capable people committed to working together to put forth an innovative technical solution for the client.

Here are some things that are done during a Project Delivery:

- Evaluate the client's business needs and analyze their technical requirements as a member of a small team
- Implement system design according to technical documentation created by senior developers
- Develop technical elements of the client's EAM solution, including database code, EAM FlexSQL, Extensibility Framework scripts with ExtJS framework, Java Scripts, web services and upload utilities
- Design and development of integration solutions, allowing EAM to work efficiently with other enterprise systems such as ERP
- Assure technical solution functionality through testing and updates to the technical solution as necessary
- Interaction with clients via telephone or email with on-site visits as needed
- Ability to work both independently and in a group setting to complete projects

THE PERSON

- Detailed oriented, solution focused
- Communicative regarding technical tasks to be completed
- Innovative and a creative technical problem solver
- Flexible to travel

THE SKILLS

- Knowledge of Structured Query Language (SQL), particularly PL/SQL and T-SQL
- Excellent interpersonal, written, and verbal communication skills to create and maintain long-lasting client relationships

- Ability to communicate convincingly and effectively with different parts of the organization
- Rigorous attention to detail and a strong focus on building client relationships

THE EXPERIENCE

- Bachelor's degree or Master's degree in an analytical field such as Computer Science, Engineering, or equivalent work experience
- Two years' experience working with databases

THE BONUS

- Knowledge of Infor EAM System Installation
- Experience with extending Infor EAM through Extensibility Framework
- Familiarity with object-oriented programming, e.g. Java, C#, VB
- Experience designing and implementing systems that use integration middleware tools
- Experience with modern web development, e.g. HTML5, ExtJS, jQuery, etc.
- Scripting experience, e.g. Python, ANT.
- Skills in web service technologies, e.g. REST, SOAP.

Advoco is an equal opportunity employer. Advoco does not discriminate on the basis of race, color, religion, sex, sexual orientation, gender identity, national origin, veteran or disability status. At Advoco we believe that diversity and inclusion among our team is essential to our success as a company, and we endeavor to recruit, develop and retain the most talented people from a diverse pool of candidates.
